

# Shower Screens

# Introduction

Shower screens are sleek, modern alternatives to tired-looking shower curtains. Used to guard a bathroom against water spray, shower screens are highly-functional glass products that protect your bathroom from moisture and cosmetics. Lee Glass use only the highest quality glass to design, shape and manufacture screens that give a contemporary touch to any bathroom.

Like every product we craft, our glaziers listen to your exact requirements to guarantee only the highest standards of functionality and beauty. We produce tailored results for any size or shape of bathroom and use cutting-edge machinery to produce shower screens that offer the perfect balance of style, privacy, and practicality.

## Some of our customisable options include:

- **Sandblasted glass for privacy**
- **Toughened glass for safety**
- **Frameless glass**
- **Shaped glass**

Working closely with our customers, we survey your bathroom area before crafting and installing the screen to your exact specifications, guaranteeing a product that works for your space.

# Why Choose Shower Screens over Shower Curtains

**Aesthetics:** Shower screens take your bathroom to another level of style and sophistication that curtains cannot offer. Not only this but their sleek, modern look can complement a diverse range of interior designs.

**Maintenance:** Curtains are more difficult to clean and maintain than screens, requiring frequent replacements after becoming unhygienic. Shower screens offer an easy-clean, durable option that will last for years.

**Customisable:** Regardless of the size or shape of your shower, Lee Glass can craft a tailored shower screen to perfectly accommodate any dimensions. This degree of design flexibility is more difficult to achieve with a curtain.

**Privacy:** Curtains offer a high level of privacy, but shower screens can equal this privacy by undergoing the sandblasting process to create a elegant, frosted appearance.

**Durability:** Glass is a durable, long-lasting option that boasts a more impressive lifespan compared to plastic curtains. Lee Glass also can provide toughened glass options to guarantee extra strength.

# Maintenance & Cleaning

## Follow these simple steps:

### Use the correct products

It may be tempting to use cleaning products already stocked in your cupboard, but to get the best results it might be worth investing in products specifically designed for shower screens. Clean as instructed on the bottle.

### Avoiding watermarks

No clean is complete without a rinse. However, if you live in a hard water area, this could result in limescale and watermarks being left behind. Therefore it's advisable to use a squeegee or similar to remove excess water after the final rinse, which will leave your screen free of watermarks and smudging.

### Getting your shine back

Reviving the glass and maintaining its shine is easy, and you can avoid your shower screen dulling overtime with this easy after-rinse step. Either use a specialist shower screen product, or try mixing equal parts white vinegar with equal parts cold water - wipe the mixture over the shower screen and then buff dry with a clean cloth.

Keeping your shower screen clean is a case of little and often. Just a quick wipe-down every week is enough to maintain high standards of hygiene and elegance.

# FAQ's

## **What types of glass can I use for my shower screen?**

Our experts can craft a variety of glass types into a finished shower screen. Just a few examples of specialist glass we offer includes: toughened for durability, sandblasted for privacy, bevelled for aesthetic purposes, plus many more.

## **Do you provide other fixtures and fittings for showers?**

Yes! As part of a comprehensive supply of products, we also provide essential shower fixtures and fittings, including: seals, handles, hinges, shower fittings.

## **Will you install my shower screen for me?**

In addition to designing and crafting products, our glaziers will also install your bespoke shower screens to ensure a perfect fit. However, if you prefer to take the DIY route, we're also happy to simply deliver the product to your chosen address anywhere throughout the East Midlands and beyond.
